Do the Math

A totally realistic goal for sales at a party is \$250. If you hold 1 party/wk (3-6 people) with average sales of \$250 per party and one facial/wk (1-2 people) with average sales of \$50, you could sell \$300 per week. If you sell \$300 per week for 12 weeks (Oct-Dec), you've sold \$3,600. Half of that will go to paying back your initial inventory investment, and let's say you use 10% for business expenses (hostess gifts, etc.) Left over, you've got just about \$1500 to spend on your Holiday Festivities for working less than 5 hours per week!
